VICTORIA, B.C., NOVEMBER 1, 1987

To Robert G. Rogers,
Lieutenant Governor of the Province of British Columbia.

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to present the Report of Vital
Statistics in the Province of British Columbia for the years
1985 and 1986.

Peter A. Dueck
Minister of Health

MINISTRY OF HEALTH
VICTORIA, B.C., NOVEMBER 1, 1987

The Honourable Peter A. Dueck
Minister of Health
Victoria, B.C.

SIR: I have the honour to submit the One Hundred and Fourteenth and Fifteenth Report on Vital Statistics in the Province of British Columbia.

I have the honour to be,
Sir,
Your obedient servant,

John Noble
Deputy Minister of Health

DIVISION OF VITAL STATISTICS,
VICTORIA, B.C., NOVEMBER 1, 1987

John Noble,
Deputy Minister of Health, Victoria, B.C.

SIR: I have the honour to submit the One Hundred and Fourteenth and Fifteenth Report on Vital Statistics in the Province of British Columbia for the years ended December 31, 1985 and 1986.

I have the honour to be,
Sir,
Your obedient servant,

R. J. Danderfer
Director of Vital Statistics

1	1. The first of the three main parts of the book is devoted to a general survey of the history of the theory of the structure of the atom.	1-10
2	2. The second part is devoted to a detailed study of the structure of the atom.	11-25
3	3. The third part is devoted to a study of the structure of the nucleus.	26-40
4	4. The fourth part is devoted to a study of the structure of the nucleus.	41-55
5	5. The fifth part is devoted to a study of the structure of the nucleus.	56-70
6	6. The sixth part is devoted to a study of the structure of the nucleus.	71-85
7	7. The seventh part is devoted to a study of the structure of the nucleus.	86-100
8	8. The eighth part is devoted to a study of the structure of the nucleus.	101-115
9	9. The ninth part is devoted to a study of the structure of the nucleus.	116-130
10	10. The tenth part is devoted to a study of the structure of the nucleus.	131-145
11	11. The eleventh part is devoted to a study of the structure of the nucleus.	146-160
12	12. The twelfth part is devoted to a study of the structure of the nucleus.	161-175
13	13. The thirteenth part is devoted to a study of the structure of the nucleus.	176-190
14	14. The fourteenth part is devoted to a study of the structure of the nucleus.	191-205
15	15. The fifteenth part is devoted to a study of the structure of the nucleus.	206-220
16	16. The sixteenth part is devoted to a study of the structure of the nucleus.	221-235
17	17. The seventeenth part is devoted to a study of the structure of the nucleus.	236-250
18	18. The eighteenth part is devoted to a study of the structure of the nucleus.	251-265
19	19. The nineteenth part is devoted to a study of the structure of the nucleus.	266-280
20	20. The twentieth part is devoted to a study of the structure of the nucleus.	281-295
21	21. The twenty-first part is devoted to a study of the structure of the nucleus.	296-310
22	22. The twenty-second part is devoted to a study of the structure of the nucleus.	311-325
23	23. The twenty-third part is devoted to a study of the structure of the nucleus.	326-340
24	24. The twenty-fourth part is devoted to a study of the structure of the nucleus.	341-355
25	25. The twenty-fifth part is devoted to a study of the structure of the nucleus.	356-370
26	26. The twenty-sixth part is devoted to a study of the structure of the nucleus.	371-385
27	27. The twenty-seventh part is devoted to a study of the structure of the nucleus.	386-400
28	28. The twenty-eighth part is devoted to a study of the structure of the nucleus.	401-415
29	29. The twenty-ninth part is devoted to a study of the structure of the nucleus.	416-430
30	30. The thirtieth part is devoted to a study of the structure of the nucleus.	431-445
31	31. The thirty-first part is devoted to a study of the structure of the nucleus.	446-460
32	32. The thirty-second part is devoted to a study of the structure of the nucleus.	461-475
33	33. The thirty-third part is devoted to a study of the structure of the nucleus.	476-490
34	34. The thirty-fourth part is devoted to a study of the structure of the nucleus.	491-505
35	35. The thirty-fifth part is devoted to a study of the structure of the nucleus.	506-520
36	36. The thirty-sixth part is devoted to a study of the structure of the nucleus.	521-535
37	37. The thirty-seventh part is devoted to a study of the structure of the nucleus.	536-550
38	38. The thirty-eighth part is devoted to a study of the structure of the nucleus.	551-565
39	39. The thirty-ninth part is devoted to a study of the structure of the nucleus.	566-580
40	40. The fortieth part is devoted to a study of the structure of the nucleus.	581-595
41	41. The forty-first part is devoted to a study of the structure of the nucleus.	596-610
42	42. The forty-second part is devoted to a study of the structure of the nucleus.	611-625
43	43. The forty-third part is devoted to a study of the structure of the nucleus.	626-640
44	44. The forty-fourth part is devoted to a study of the structure of the nucleus.	641-655
45	45. The forty-fifth part is devoted to a study of the structure of the nucleus.	656-670
46	46. The forty-sixth part is devoted to a study of the structure of the nucleus.	671-685
47	47. The forty-seventh part is devoted to a study of the structure of the nucleus.	686-700
48	48. The forty-eighth part is devoted to a study of the structure of the nucleus.	701-715
49	49. The forty-ninth part is devoted to a study of the structure of the nucleus.	716-730
50	50. The fiftieth part is devoted to a study of the structure of the nucleus.	731-745
51	51. The fifty-first part is devoted to a study of the structure of the nucleus.	746-760
52	52. The fifty-second part is devoted to a study of the structure of the nucleus.	761-775
53	53. The fifty-third part is devoted to a study of the structure of the nucleus.	776-790
54	54. The fifty-fourth part is devoted to a study of the structure of the nucleus.	791-805
55	55. The fifty-fifth part is devoted to a study of the structure of the nucleus.	806-820
56	56. The fifty-sixth part is devoted to a study of the structure of the nucleus.	821-835
57	57. The fifty-seventh part is devoted to a study of the structure of the nucleus.	836-850
58	58. The fifty-eighth part is devoted to a study of the structure of the nucleus.	851-865
59	59. The fifty-ninth part is devoted to a study of the structure of the nucleus.	866-880
60	60. The sixtieth part is devoted to a study of the structure of the nucleus.	881-895
61	61. The sixty-first part is devoted to a study of the structure of the nucleus.	896-910
62	62. The sixty-second part is devoted to a study of the structure of the nucleus.	911-925
63	63. The sixty-third part is devoted to a study of the structure of the nucleus.	926-940
64	64. The sixty-fourth part is devoted to a study of the structure of the nucleus.	941-955
65	65. The sixty-fifth part is devoted to a study of the structure of the nucleus.	956-970
66	66. The sixty-sixth part is devoted to a study of the structure of the nucleus.	971-985
67	67. The sixty-seventh part is devoted to a study of the structure of the nucleus.	986-1000

INTRODUCTION

The Division of Vital Statistics is responsible for ascertainment, registration, and certification of vital events by administering statutory registration functions under the British Columbia Vital Statistics Act, Marriage Act, Name Act, and Wills Act. The Division also maintains a provincial registry of cases with congenital anomalies and handicapping conditions which was established in 1952. These data bases provide information for research and program evaluation, as well as providing statistics to indicate the need for various services and programs.

The birth, death, and marriage statistics shown in this report may not agree with those published by Statistics Canada. A redistribution of these events occurring in British Columbia residents outside of the province is performed by Statistics Canada, but these events are not included in this report.

This publication is a summary of vital statistics information for the Province of British Columbia for 1985 and 1986. Additional information can be requested by writing to the Director of the Division of Vital Statistics.

The Commission has been informed that the Government of the United States has agreed to provide a loan of \$100 million to the Government of the Republic of the Philippines for the purpose of financing the construction of a new airport at Manila. The loan is to be repaid over a period of 25 years at an interest rate of 6 percent per annum. The Government of the Philippines has agreed to provide a guarantee for the loan. The Commission has also been informed that the Government of the United States has agreed to provide a loan of \$50 million to the Government of the Republic of the Philippines for the purpose of financing the construction of a new airport at Cebu. The loan is to be repaid over a period of 25 years at an interest rate of 6 percent per annum. The Government of the Philippines has agreed to provide a guarantee for the loan. The Commission has also been informed that the Government of the United States has agreed to provide a loan of \$50 million to the Government of the Republic of the Philippines for the purpose of financing the construction of a new airport at Iloilo. The loan is to be repaid over a period of 25 years at an interest rate of 6 percent per annum. The Government of the Philippines has agreed to provide a guarantee for the loan.

POPULATION

The estimated population of British Columbia as of June 1, 1985 was 2,884,700.*

Following the Statistics Canada Census of June, 1986, the population of June 1, 1986 was determined to be 2,889,207.*

BIRTHS

The number of live births in British Columbia in 1985 was 42,747, compared to 44,040 in 1984. This represents a three percent decrease in the number of live births in 1985, compared to the previous year.

The number of live births in British Columbia in 1986 was 41,812. There was a five percent decrease in the number of live births in 1986, compared to 1984.

The birth rate in 1985 was 14.8 per 1,000 population, and in 1986 it was 14.5 per 1,000 population. These birth rates are lower than the 15.3 per 1,000 population in British Columbia in both 1983 and 1984.

The average age of a woman having a live born infant in British Columbia in 1984, 1985 or 1986 was just under 27 years.

In 1985, women under the age of 20 had 5.4% of all live births and women aged 35 or older had 7.4% of all live births.

In 1986, both women under the age of 20 and women aged 35 or older had 6.9% of all live births.

Live born infants weighing 2,500 grams or less (considered premature by weight) accounted for five percent of all live births in both 1985 and 1986.

Among live born infants with a birth weight greater than 500 grams, the average birth weight was 3,432 grams in 1985, and 3,430 grams in 1986. There were 41 live born infants in 1985 and 30 in 1986 whose birth weight was less than 500 grams.

First births accounted for 42% of all live births in British Columbia in 1986 and 43% of all live births in 1985. The percentage of first births was higher in earlier years: 47% in both 1984 and 1983, and 48% in 1982.

* All population information is from Statistics Canada.

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β .

2. In the second part of the paper we shall consider the case of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β .

3. In the third part of the paper we shall consider the case of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β .

4. In the fourth part of the paper we shall consider the case of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β .

5. In the fifth part of the paper we shall consider the case of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β .

6. In the sixth part of the paper we shall consider the case of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β .

7. In the seventh part of the paper we shall consider the case of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β .

8. In the eighth part of the paper we shall consider the case of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β .

9. In the ninth part of the paper we shall consider the case of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β .

10. In the tenth part of the paper we shall consider the case of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β .

BIRTHS

There were seven sets of live born triplets in British Columbia in 1985. In 1986 there were three sets of live born triplets, and one set where two of the infants were live born.

MARRIAGES

The number of marriages in British Columbia was 22,270 in 1985, and 21,819 in 1986, compared to 23,394 in 1984.

The number of marriages in British Columbia has decreased each year since 1981, and there has been a twelve percent decrease in the number of marriages in 1986 compared to 1981.

The average age of brides and grooms was 28 and 31 respectively for 1985. The average age of brides and grooms was 28 and 32 respectively for 1986.

Neither the bride nor the groom had been married before in 74% of the marriages in British Columbia in 1985. Neither the bride nor the groom had been married before in 72% of the marriages in British Columbia in 1986.

DEATHS

There were 21,404 deaths in British Columbia in 1985 including 306 deaths of non-residents.

There were 21,351 deaths in British Columbia in 1986 including 366 deaths of non-residents.

The death rate in British Columbia was 7.3 per 1,000 population in both 1985 and 1986.

Acute and chronic heart disease and malignant neoplasms continued to be leading causes of death in British Columbia.

Deaths from motor vehicle accidents and suicides accounted for more than half of the deaths from accidents and violence in British Columbia in both 1985 and 1986.

The death rate for deaths from motor vehicles accidents in British Columbia was 15.8 per 100,000 population in 1985 and 18.2 per 100,000 in 1986; these are the lowest rates of motor vehicle accident deaths in British Columbia in the last twenty years.

The suicide rate in British Columbia was 14.7 per 100,000 population in 1986 and 16.1 per 100,000 population in 1985. The 1985 suicide rate was the highest for any year since 1980.

The infant mortality rate (deaths of infants under one year of age) in British Columbia was 7.6 per 1,000 live births in 1985 and 8.1 per 1,000 live births in 1986. The infant mortality rates in British Columbia have decreased each year since 1966. In 1985 the lowest infant mortality rate was recorded.

In 1985 the majority of infant deaths occurred during the first week of life. In 1986 the majority of infant deaths occurred during the first month of life.

The neonatal death rate (deaths of infants under 28 days old) in British Columbia was 4.5 per 1,000 live births in 1985 and 4.6 per 1,000 live births in 1986. The neonatal death rates in British Columbia have decreased each year since 1981 until 1985 when the lowest neonatal death rate was recorded.

The early neonatal death rate (deaths of infants under 7 days old) in British Columbia was 4.1 per 1,000 live births in 1985 and 3.9 per 1,000 live births in 1986; these are the lowest early neonatal death rates recorded in British Columbia.

The definition of a stillbirth was revised in 1986. Prior to that time, stillbirths had a gestational age of at least twenty weeks. Since 1986 the definition of a stillbirth has been expanded to include any fetus with a weight of 500 grams or more, as well as those with a gestational age of at least twenty weeks.

The stillbirth rate in British Columbia was 7.7 per 1,000 total births in 1985 and 7.4 per 1,000 total births in 1986. These rates are higher than the rates of 7.1, 7.3, and 6.9 recorded in 1982, 1983, and 1984 respectively; but lower than the stillbirth rates in British Columbia prior to 1980.

The perinatal death rate (stillbirths plus infant deaths under seven days of age) in British Columbia was 11.9 per 1,000 total births in 1985 and 11.1 per 1,000 total births in 1986. These rates are very similar to the perinatal death rates of 11.9 in 1983 and 11.1 in 1984 in British Columbia.

In both 1985 and 1986, stillbirths accounted for almost two-thirds of the perinatal deaths.

HEALTH SURVEILLANCE REGISTRY

Approximately one in twenty live births in British Columbia is born with a major or minor congenital anomaly.

About forty to forty-five babies with Down's syndrome are born each year in British Columbia.

There were at least 5,319 people living in British Columbia at year-end 1986 who had some type of paralysis. The prevalence rate of paralysis in British Columbia in 1986 was 18.4 per 10,000 population or about one person in 550.

The prevalence of diabetes in British Columbia at year-end 1986 was 33.8 per 10,000 population or about one person in 300.

1880-1881. The first of these was the "Great Famine" of 1880-1881, which was caused by a combination of factors, including a severe drought and a lack of food supplies.

1882-1883. The second of these was the "Great Famine" of 1882-1883, which was caused by a combination of factors, including a severe drought and a lack of food supplies.

1884-1885. The third of these was the "Great Famine" of 1884-1885, which was caused by a combination of factors, including a severe drought and a lack of food supplies.

1886-1887. The fourth of these was the "Great Famine" of 1886-1887, which was caused by a combination of factors, including a severe drought and a lack of food supplies.

1888-1889. The fifth of these was the "Great Famine" of 1888-1889, which was caused by a combination of factors, including a severe drought and a lack of food supplies.

1890-1891. The sixth of these was the "Great Famine" of 1890-1891, which was caused by a combination of factors, including a severe drought and a lack of food supplies.

1892-1893. The seventh of these was the "Great Famine" of 1892-1893, which was caused by a combination of factors, including a severe drought and a lack of food supplies.

1894-1895. The eighth of these was the "Great Famine" of 1894-1895, which was caused by a combination of factors, including a severe drought and a lack of food supplies.

1896-1897. The ninth of these was the "Great Famine" of 1896-1897, which was caused by a combination of factors, including a severe drought and a lack of food supplies.

1898-1899. The tenth of these was the "Great Famine" of 1898-1899, which was caused by a combination of factors, including a severe drought and a lack of food supplies.

1900-1901. The eleventh of these was the "Great Famine" of 1900-1901, which was caused by a combination of factors, including a severe drought and a lack of food supplies.

1902-1903. The twelfth of these was the "Great Famine" of 1902-1903, which was caused by a combination of factors, including a severe drought and a lack of food supplies.

1904-1905. The thirteenth of these was the "Great Famine" of 1904-1905, which was caused by a combination of factors, including a severe drought and a lack of food supplies.

TABLE 1. SUMMARY OF BIRTHS, DEATHS, MARRIAGES, AND INFANT MORTALITY
British Columbia, 1965, 1975, 1985 & 1986

	1965		1975		1985		1986	
	Number	Rate	Number	Rate	Number	Rate	Number	Rate
LIVE BIRTHS (rate per 1,000 population)*.....	33,669	18.8	36,281	14.8	42,747	14.8	41,812	14.5
DEATHS (rate per 1,000 population)*.....	15,784	8.8	19,151	7.8	21,098	7.3	20,985	7.3
MARRIAGES (rate per 1,000 population)*.....	13,639	7.6	21,624	8.9	22,270	7.7	21,820	7.6
STILLBIRTHS (rate per 1,000 total births).....	447	13.1	414	11.3	332	7.7	309	7.4
PERINATAL DEATHS (rate per 1,000 total births).....	869	25.5	703	19.2	508	11.9	473	11.2
INFANT DEATHS (rate per 1,000 live births).....	697	20.7	524	14.4	327	7.6	340	8.1
NEONATAL DEATHS (rate per 1,000 live births).....	462	13.7	337	9.3	194	4.5	194	4.6
EARLY NEONATAL DEATHS (rate per 1,000 live births).....	422	12.5	289	8.0	176	4.1	164	3.9

* Rates for 1985 use the Statistics Canada estimate of the B.C. population on June 1, 1985; rates for 1986 use census information for June 1, 1986.

Injury Resulting from Operations of War.....	1	*	2	*	1	*	0	-	0	-
TOTAL.....	2,091	75.1	1,993	70.6	1,873	65.3	1,816	63.0	1,738	60.2

* Rate less than .05 per cent

Rates per 100,000 population using the Statistics Canada estimate of the
B.C. population on June 1, 1985 and census information for June 1, 1986.

TABLE 12. TWELVE LEADING CAUSES OF DEATH
British Columbia, 1984, 1985 & 1986

CAUSE OF DEATH	1984			1985			1986		
	Rank	Number	Rate	Rank	Number	Rate	Rank	Number	Rate
Diseases of Heart	1	6,511	227.1	1	6,460	223.9	1	6,297	217.9
Malignant Neoplasms	2	5,377	187.2	2	5,351	185.5	2	5,540	191.7
Cerebrovascular Disease	3	1,750	61.1	3	1,761	61.0	3	1,688	58.4
Accidents (excludes: suicide & homicide)	4	1,373	47.8	4	1,249	43.3	4	1,238	42.8
Pneumonia	5	761	26.6	5	841	29.2	5	781	27.0
Diseases of Arteries	6	568	19.8	6	630	21.8	6	579	20.0
Suicide	7	399	13.9	7	465	16.1	7	425	14.7
Diabetes	8	294	10.3	8	316	11.0	8	319	11.0
Chronic Liver Disease & Cirrhosis	9	244	8.5	9	302	10.5	9	286	9.9
Emphysema	10	152	5.3	10	166	5.8	10	134	4.6
Certain Causes of Perinatal Mortality	11	150	5.2	11	136	4.7	11	125	4.3
Chronic Bronchitis	12	115	4.0	12	97	3.4	12	87	3.0

Rates per 100,000 population using the Statistics Canada estimate of the B.C. population on June 1, 1985 and census information for June 1, 1986.

The numbers shown above do not include deaths to non-residents.

TABLE 13.
